

Embracing Sustainability Through Advanced Coatings

with

IngeniaTouch Ltd | Reg, 36 Fitzwilliam Square | Dublin 2, D02 HX82, Ireland

Company Number: 562651 Ireland | Vat Number IE- 3567878RH

Member of SSPC: The Society for Protective Coatings / Member of steering committee Techies Go Green www.techiesgogreen.com

Join the Green Revolution in Facility Services and Cleaning Cycles!

Are you ready to revolutionise your facility management practices while contributing to a greener, more sustainable future? Explore the transformative power of advanced coatings like HygieniaTouch, designed to redefine how we protect assets, conserve resources, and enhance overall well-being.

Unlocking Sustainable Solutions:

1. **Asset Protection:** Advanced coatings such as HygieniaTouch form robust barriers, corrosion and degradation. Experience extended shelf-life and reduced maintenance costs.
2. **Water Conservation:** With water scarcity becoming an increasingly pressing global issue, every drop counts. By adopting advanced coatings, you not only minimise water usage traditionally associated with cleaning processes but also contribute to water conservation efforts.
3. **Chemical-Free Hygiene:** Bid farewell to harmful chemicals! Embrace a healthier environment by eliminating the need for hygiene chemicals. Advanced coatings offer a sustainable alternative, promoting hygiene without compromising on safety.

4. **Air Quality Enhancement:** Improve indoor air quality and promote a healthier workspace for all. Advanced coatings contribute to reducing airborne pollutants, fostering a cleaner and fresher atmosphere conducive to productivity and well-being.
5. **Energy Efficiency:** Reduce your carbon footprint while cutting down on energy costs. Advanced coatings help optimise energy usage by minimising friction and enhancing operational efficiency, leading to tangible savings and environmental benefits.
6. **Cross-Infection Risk Reduction:** In today's world, hygiene is paramount. Advanced coatings play a crucial role in reducing the risk of cross-infection by creating hygienic surfaces that inhibit the growth and spread of harmful microorganisms, pathogens, mildew and algae.

Experience the Difference:

By integrating advanced coatings into your facility services and cleaning cycles, you embark on a journey towards sustainability, efficiency, and value creation. Embrace innovation, reduce environmental impact, and elevate the standards of facility management.

Join the Movement Today!

Take the first step towards a greener future by incorporating advanced coatings into your facility management strategy. Contact us to learn more about the transformative benefits and how you can make a meaningful impact while driving sustainability and value.

Together, let's pave the way for a brighter, more sustainable tomorrow with advanced coatings!
