HygieniaTouch Self-Cleaning Glass Coating

Upgrade your home, workplace, or glasshouses with the cutting-edge technology of photocatalytic coatings on glass. Experience a myriad of benefits that enhance your environment while promoting sustainability and well-being.

Unparalleled Sustainability:

TiO₂ coated glass facilitates automatic self-cleaning, reducing water and chemical usage by up to 50%. Embrace eco-friendly practices without compromising cleanliness and hygiene.

Enhanced Air Quality:

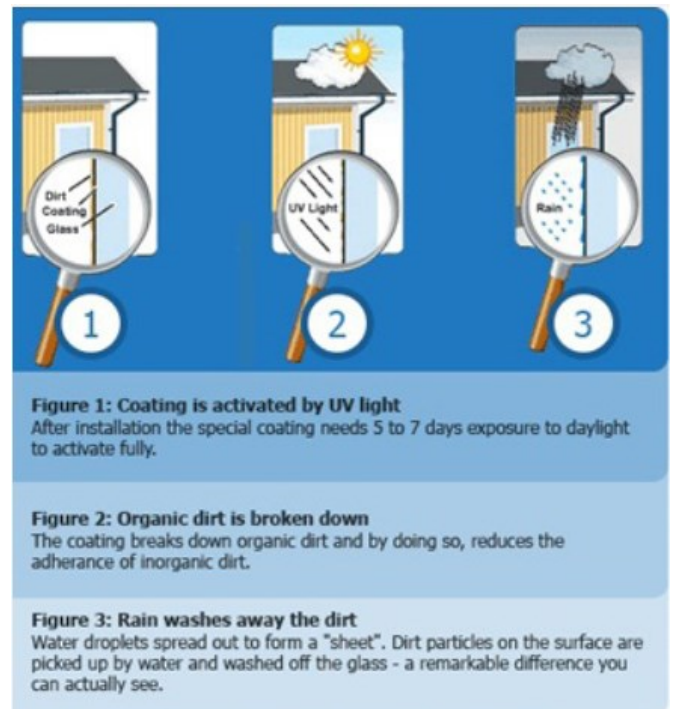

For asthma sufferers, the immune-compromised, and children in schools, TiO₂ coated glass purifies the air by decomposing harmful pollutants. Breathe easier and foster a healthier atmosphere for all occupants.

Economical Advantages:

Save on maintenance costs and labour with self-cleaning capabilities, minimizing the need for constant upkeep. TiO₂ coated glass offers long-term value by reducing the frequency of cleaning cycles and associated expenses.

Aesthetically Pleasing:

Transform the visual appeal of your space with sleek and pristine glass surfaces. TiO₂ coatings maintain clarity and brightness, enhancing the aesthetic while promoting a clean and inviting ambiance.

Upgrade to TiO₂ coated glass today and embrace a sustainable, and visually stunning environment for years to come. Experience the difference with TiO₂ technology – revolutionising the way you perceive glass surfaces.

HygieniaTouch Self-cleaning TiO₂ glass coatings can be applied on tempered glass, coated glass, insulated glass and laminated glass.
