

## Protozoa and algae shown to be killed

Organism	Reference
<b>Protozoa</b>	<b>Protozoa</b>
<i>Acanthamoeba castellanii</i>	Sökmen et al. (2008)
Only 50% kill for cysts, trophozoites were sensitive	50% kill for cysts, trophozoites were sensitive
<i>Acanthamoeba polyphaga</i> environmental isolate	Llonnen et al. (2005)
<i>Cryptosporidium parvum</i>	Ryu et al. (2008)
<i>Cryptosporidium parvum</i>	Curtis et al. (2002)
<i>Giardia</i> sp. Fibrous	Navalon et al. (2009)
<i>Giardia intestinalis</i> cysts	Sökmen et al. (2008)
<i>Giardia lamblia</i>	Lee et al. (2004)
<i>Tetrahymena pyriformis</i>	Peng et al. (2010)
<b>Algae</b>	<b>Algae</b>
<i>Amphidinium corterac</i>	Rodriguez-Gonzalez et al. (2010)
<i>Chlorella vulgaris</i>	Matsunaga et al. (1985)
<i>Cladophora</i> sp.	Peller et al. (2007)
<i>Chroococcus</i> sp. 27269	Hong et al. (2005)
<i>Melosira</i> sp.	Kim and Lee (2005)
<i>Oedogonium</i> sp.	Linkous et al. (2000)
<i>Tetraselmis suecica</i>	Rodriguez-Gonzalez et al. (2010)
